Monitor Your He

The Best Fingertip Pulse Oximeter to Monitor your Blood

[BUY NOW](#)

Certified and Safe

CE certified and FDA 510k premarket approve, it is recommended by Health Care Professionals.

Easy to Operate

Just put one finger into the fingertip and the screen will show results in 10 seconds.

Energy Conservation

2 AAA batteries included in the package can be operated continuously for more than 30 hours. And the oximeter will automatically power off within 5 seconds.

CUSTOMER REVIEWS

We absolutely love this infrared thermometer. This thermometer has faster and easier reading (compared to the one I got from CVS). It's very accurate as well. During flu season and cold winter, it was useful for us to track fever from headache or cold. I have bought several different thermometers. So far, it is the best one. It comes with batteries. The instruction is very easy to follow. It gives the number right away after hold on button for few seconds. And easy to switch between C and F. The best thing is that it will not disturb my baby's sleep. Highly recommend.
