Description

Reviews (0)

- ▶ **DAMP & MOLD SPORES:** Aidodo air dehumidifier uses the Electric tech to remove up to 300 ml of water per day in a humid environment of 30 °C and 80% RH.It can effectively eliminate the moisture, mold and other allergens, creating a comfortable environment for you and your family. Perfect for removing damp, mould and moisture from your home, kitchen, bathroom, bedroom, caravan, garage or basement
- ▶ **MUITI-PURPOSE BUT ULTRA QUEIT -** Dehumidifiers for home take excessive water out of the air. This can have a huge impact on the environment in your home during the summer, helps to preventing the peeling of wallpaper, protecting home electronics and music equipment, preserving documents, and keeping sofas, chairs and curtains from smelling. **SUPER QUIET DESIGN,** noise is below 35dB,runs quiet with no annoying sound,without disturbing your sleep, work or study, perfect for space

like bedroom

► **EASY TO OPERATE AND PORTABLE** - Our safe dehumidifier is designed with only one power button to make it easy for everyone to use. Press the on/off button to start dehumidifying(blue light), then let it run its continuous 24-hour cycle until the tank is full(RED light), at which point our portable dehumidifier will automatically shut-off.Compact and lightweight, it can be carried from the room to the office, or take it to your RV or Camper.(SIZE: 16.7CM*11.1*24.5CM)

► **SMART POWER-OFF AND ENERGY SAVING** - equipped with a water level controller, our dehumidifier for bedroom can shut off itself when the controller reaches its max level and the indicator light turns YELLOW to remind you to empty the tank out. Compare to older dehumidifiers,our small dehumidifier use a fan to move air over refrigerated coils, pull water from the air, and drip it into a tank.That means you'll see savings in operating costs compared with older dehumidifiers!
