Frequently asked questions (FAQ)

1. Is it a lot thicker with the glass applied?

The thickness of the screen protector is only 0.3mm, and feels just like your Phone's original glass screen.

2. Why is the screen protector smaller than my Phone's screen? Does this cover the whole screen?

Due to the Phone's curved edges, the screen protector is designed to be smaller than the actual screen to prevent bubbling and peeling at the edges.

3.How can I avoid dust spots and bubbles?

Before installing screen protector, please make sure to clean the screen as the instruction in the package. If you still find bubbles. Here are some tips to deal with the problems. If the bubble is big, lift one corner of the screen protector to eliminate it, then place the protector back in position. If there are still tiny bubbles, please press them for about 1 minute.

4. If I purchased the wrong size can I exchange it for the right size?

Sure! We are happy to send you the right size screen protector as a replacement or We can make full refund to you.
