

Our approach to recovery

Patients Are Unique. So Are Their Treatment Needs.

CleanSlate treats patients with life-saving medications and care coordination.

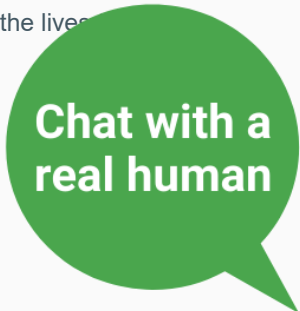

Our mission is simple: Improve the quality of life for people suffering from opioid and alcohol addictions.

We're accomplishing this first through high-quality medication-assisted treatment (MAT) led by physicians and licensed medical providers in a convenient outpatient environment.

We combine this science with hands-on care, providing our patients with psychosocial support and intensive care coordination with a wide network of partners in every community.

To date, CleanSlate has treated more than 60,000 patients in over 80 centers across the country, working closely with our partners to save and change lives.

Every day, we are Warriors For Hope, helping people suffering from addiction achieve the lives they want and deserve.
