### Product description

Size: 8"

\*Important Tips: This machine's working principle is so easy, so if you have any problem when you use it, kindly pls contact us via Amazon's email.

\*Note:

1) To adjust the temperature what you need when using it for the first time.

2) Keep the handle pressed down for 2-3 seconds to get seals optimal results.

\*Voltage: 110 V / 60 hz - Impulse power: 350W Heat Time: 1.5-3.5 Sec. \*The red light is not predictable when plug into the power. It is only predictable when keep the handle pressed down on bottom.

\*Keep the sealer's surface clean to avoid the oxidation of the residue which will reduce the life of the heat sealing strip.

\*Package Contents:

\*Impulse heat sealer +1 Extra sealing elements + Instruction manual

\*Level 3-3.5 is enough for most applications.

**Question:** [If I use this machine to seal/cut poly decomesh, do I need to use a mask?](#)

**Answer:** No. Your iron probably gets hotter than this. No smoke, no oder. This is assuming you are using proper seal bags.  
 By Edna Van Eyck on March 29, 2020

**Question:** [Will this work with Mylar bags?](#)

**Answer:** Dear,you can use it for the Mylar bags,but you need to adjust the temperature about 3 Grade and keep the handle pressed down for 3-3.5 seconds to get seals optimal results.Otherwise the sealing place will be not smooth.Thanks!

★★★★☆ Stopped Working after a few days...

Reviewed in the United States on November 20, 2019

Verified Purchase

Don't waste your money, unless using it for a few days... to only find out you can't get a fast replacement through Amazon (two days and by 9pm)... so IF you need this to be reliable like we did (just down our momentum to open up a retail shop as needed to seal bags!).... then buy something else! Also bought the warranty for it, which was useless, unless it is why I had to sit on the Amazon chat for almost 30 minutes while Alvin advised me to "plug it into another outlet". Seriously.... :(

They all seem to be labeled and look the same though.... Hoping the next one works longer then three days!

★★★★☆ HORRIBLE

Reviewed in the United States on February 5, 2020

Verified Purchase

Don't waste your money on this item. I received this item and the package was torn up. Once taken out of the package, the cord was not tied up like most items would be. I could tell it used to be but it was just all over the box. The machine it's self was filthy and had smudges and nasty greasy fingerprints all over it. I would not waste my money purchasing this item. I would recommend spending a few dollars more for a better quality item.

★★★★☆ Tried two. Both broken..

Reviewed in the United States on May 1, 2020

Size: 8" | Verified Purchase

One worked great for about 10 bag seals. Then it just died. They sent a replacement which was obviously used. Tried that one and it makes a LOUD buzzing noise and smells. I dont think I will try a third one.

☆☆☆☆☆ Easy to used

Reviewed in the United States on March 20, 2020

[Verified Purchase](#)

I was so happy with this sealing machine it's awesome and Great purchase for the pric.It works as expected and I'm pleased with it.

First,It's so easy to use,you just need to press the handle then you can hear the tick when seal is done and waiting 2.5-3.5 seconds to get seals optimal results for bag's sealing place smooth. But I'll mention briefly is that higher settings don't necessarily always mean a stronger seal. I recommend starting low and gradually increasing your settings from 2.5-4.5 temperature grade for the different thick bags.

Although it takes a few trial and error takes to get the setting just right for the bags you are using, but once you get that, packaging cookies are a breeze! It does create and air tight seal, so make sure you remove some of the air from the bag before sealing if you are shipping so the bag doesn't pop in transit.

It comes with replacement consumable parts as well, so its bound to last for a long time -

 Francesca

☆☆☆☆☆ Complete Junk

Reviewed in the United States on June 11, 2020

Size: 8" | [Verified Purchase](#)

So cheaply made and literally broke after the first couple times of using. I was able to fix it the "first" time it broke but then it broke again after that and I gave up. I would have to hold the handle down at a weird angle just to get it to work. Another issue is that the heat doesn't stay consistent. After sealing about 3-4 bags it just starts warping the bags no matter what heat level I turn it down to. This will be going in the trash. I just purchased a different one that was double the price but looks to be so much more sturdy.

 Prodigy

☆☆☆☆☆ I'm amazed on how bad quality this product was. Like if this was 5 U\$, still bad.

Reviewed in the United States on December 22, 2020

[Verified Purchase](#)

Do you remember when you buy those super cheap Christmas lights? that the cable is a joke, but you think, ok, I paid 2 dollars for them.. Well this high energy usage machine has even worst cable than that.

You are rolling the dices in every use for catching fire or get electrocuted.

After I used it for 2 or 3 seals, start smelling like burned from inside. I immediately stop using it and returned. This is not even safe. I thought that not buying the cheapest model will get something better. I was wrong.

★★★★☆ Simple heat sealer

Reviewed in the United States on December 18, 2020

Size: 8" | Verified Purchase

Heat sealer, works well if the bag or package is single thickness. I used this to seal stand up coffee bag, the side had folded edges which is thicker than the center of the bag. It would not create a seamless seal even when I pressed hard for 10 seconds. It seems the rubber wasn't enough pressure to press the plastic together, so I started double sealing, which melted the bags. This sealer only worked for approx. 1 month. I replaced the heating element and it still did not work.
