Ultra-bright dimmable LED lights, night lights with up to 120 lumens, very suitable for dark places. Touch and hold the control panel, as needed, 1LM (minimum) to 120LM (maximum) brightness, smooth DIY. Or click the control panel to select the brightness you need.

[Daily energy saving] In automatic mode, when motion is detected in the dark, the light will automatically turn on and light up 90 seconds after the last motion is detected. It will automatically shut down, reducing unnecessary power consumption when not needed. It is always on in boot mode.

[Comfort light] When walking in the dark, the warm white light makes the eyes bright. As a kind of sleep light, you may feel relaxed and comfortable, and will not wake you up at midnight.

[Compact size & inductive motion sensor] The mini night light design can be plugged into any standard socket, and the second socket can be used freely.

The motion sensor will be activated to provide you with a detection angle of 120 degrees in the range of 10-10 feet (about 3-4 meters). Wide range of applications: a good guide for bathrooms, kitchens, children's rooms, nurseries, garages, stairs, corridors, basements, and wherever you need extra light.

product information

Size: 2 packs

technical details

Product weight 80 g

Product size 3 x 1.6 x 0.84 cm
