Using aluminum alloy shell and metal outer unit, simple connection DIY operation. The extension can be hung on the wall or attached to the glass with super glue.

The special side tone processing chip with automatic sound function can effectively improve the whistle. Anti-interference and noise-free function; microcomputer processing circuit solves echo and scream problems

Both internal and external units have speakers and microphones. The volume and microphone sensitivity can be adjusted separately. The host is designed with independent internal and external mute switches, which can be easily controlled to meet our needs.

Using full-duplex voice intercom communication technology, the voice signal is automatically recognized and processed during the call. Adopt 4-core high-strength aluminum foil shielded cable; strong anti-interference ability; make the voice clear and natural

Two-way voice intercom communication technology; automatic recognition and processing of voice signals during a call without any operation.

Applicable to bank certificate companies* etc.

WINDOW INTERCOM

I own a hot dog stand, and in this pandemic, we set up a door between customers and cashiers. It is difficult to hear the voice of the customer when accepting the order, but using the tgis window speaker works well. Customers will not repeat to us.

WINDOW INTERCOM

This is much better than I expected! I have an office window and want to close it to limit customer interaction due to COVID. This is loud enough and the volume is adjustable. Both microphones can pick up sound well. The sound is not very clear-it sounds like a through-car window or a Buck's teller window-but it is understandable. Will buy again!
