## MOUSE

I didn't turn it into a consistent rotation of desktop peripherals, but this feature is awesome. It is wired and large, but all of its c ontent is smooth, and in fact it is what it looks like, just like Compaq, Gateway or IBM will send it with your new home PC in 19 98 or 2000. The upgrade from one of them is optical, not clanging, but still has a certain weight.

#### MOUSE

The appearance and quality of this mouse is still very good, the hand feel of this mouse is really good, and the button sound is not loud, the Bluetooth connection is very fast, and overall satisfaction.
