

Alexander Construction Company East

Then and Now

In 1955 the Alexander Construction Company began operation in Palm Springs California, introducing mid century modern designs to the masses.

Over 40 years later, *Alexander Construction Company East* follows the same model of using the best architects to create clean, beautiful, and thoroughly functional homes.

About

Alexander Construction Company East picks up where ACC left off, on the other coast. Much like the original Alexander homes that blended indoor and outdoor living, our homes find the perfect balance between social and quiet time, beauty and function, they are inviting and secure.

Alexander Construction Company East takes a holistic approach to home building and ownership which takes shape in a number of ways:

- Low cost of ownership, efficient to heat and cool
- Anticipate ebbs and flows, work to prevent problems
- Incorporate the tenets of Feng Shui, achieve maximum balance
- Build strong and sturdy, integrate safety and security
- Simple honest materials, wood, glass, concrete and steel
- Peace of mind through simplicity, eliminate complexity
- Ergonomics of movement, plan movement in space

The Homes

After spending almost 20 years in the area, the Hudson Valley announced itself as the perfect place to blend these ideals. *Alexander Construction Company East* merges the best of innovative Palm Springs architecture and Hudson Valley living. Each house features a public downstairs and a private upstairs with a circular staircase connecting the two.

Exterior Finishes

Alexander Construction Company East has completed buildable exterior plans that can be customized to suite.

- Three building facades: Stucoflex facade, charred wood facade, cinder block facade
- Three roof lines: flat roof, shed roof, or green roof, all with sky light
- Three exterior additions: Built-in steel circular table, circular cedar hot-tub, circular concrete fire pit

Interior Finishes

Alexander Construction Company East has completed buildable interior plans that can be customized to suite.

- Kitchen: customizable countertops in butcher block, steel or marble
- Bath: separate WC room, separate shower room, and free standing bathtub
- Bed: custom closets, overhead lighting and adjustable wall lighting

The People
