- PD 100W Fast-Charging Technology - VTONCE P302 uses fast-charging technology, which can efficiently power portable stations while simultaneously connecting DC 60W input and USB PD 100W input. A full charge can be completed within 2 to 3 hours at the fastest.
- Support Multiple Devices Charging: VTONCE Portable Station has 3 x USB Type-A (1 of which supports fast charging), 1x100W USB Type-C, 5 x DC output terminals, 4 x AC outlet output (frequency 60Hz). It supports up to 13 devices to charging at the same time so that flexibly supports multiple household appliances. USB Type-C power transmission is bidirectional, allowing your device to power up and receive power.
- MPPT Control Design - When charging from the solar panel, the MPPT (control device that automatically maximizes the power generation output) function is installed, so it can be efficiently charged from the solar panel. It can be used in an emergency or where there is no power supply. Using a dedicated 120W solar panel, we can be fully charged in just 4 hours. (Not including the solar panels)
- Equipped with 18W High-Brightness Lights - It has 4 modes so that you can easily control the light switch with one hand, and quickly switch between 4 kinds of lighting modes (low brightness→medium brightness→high brightness→SOS→off). It can project a powerful beam of up to 500 meters and is suitable for large-area lighting.
- BMS with Excellent Safety: The product is equipped with an advanced battery management system (BMS), such as temperature control, overvoltage/overcurrent protection and short circuit prevention functions, and detects short circuits and overloads when performing incorrect operations. It is widely used for disaster prevention, camping, mountain climbing, night fishing, night lighting, power outage, earthquake protection, outdoor, other work lighting and home use.
