## Add Your Company

Customer service is key to business growth

Investing in customer service helps activate your flywheel because loyal customers will help you acquire new customers, free of charge, by convincing prospects to interact with your brand. And, their positive testimonials will be more effective than any of your current marketing efforts, and cheaper, too.

How can helloblue be of help?

Easy access however to your customer service, is the main core that could benefit your business by growing faster. Once you sign up, the helloblue AI will then learn the pronunciation of

Once you sign up, the helloblue AI will then learn the pronunciation of the name of your business, so if users say your company's name in the helloblue app, they will be routed directly to your customer service department, INSTANTLY!

Get started

## How it works?

Here is a quick summary of the three main steps involved from the moment you helloblue until the magic happens.

Let's say you are in a hurry and you need to be connected to certain customer service. Start the app and tap the blue mic button

Say the company's name you wish to reach. And within seconds, it matches a record in helloblue's database of thousands of businesses

You'll then be routed to the named business, via phone. If the company has no phone support, it'll be routed via email or URL
