guardian

Guardian is a private company that provides a comprehensive and cost effective solution for care coordination management to a broad spectrum of healthcare entities. Our platform offer best in class solutions to empower healthcare professionals looking to transform patient care.

Our patient-centric Clinical Command Center provides highly trained Care Managers with the ability to communicate real-time with patients as well as other healthcare providers and entities involved in their patients' care. This truly integrated communication model provides the patients' Primary Care Physician with the ability to oversee and effectively manage the overall healthcare of their patient, allowing them to focus on areas of potential intervention to keep their patients as healthy as possible.
