**INTEGRATE YOUR PRODUCT
WITH VALUE-ADDED FEATURES LIKE:
ILLUMINATION, HEATING, COOLING,
TRACKING, AUDIO AND MUCH MORE**

WE INTEGRATE OUR INNOVATIVE PATENTED TECHNOLOGY INTO YOUR PRODUCTS.

FUSE develops innovative products and chooses select Licensees to partner with us exclusively in integrating our technology within a myriad of industries. FUSE licenses its patented technology that allows our Licensee Partners to yield higher profit margins, earn additional market shares within their industry, and gain multiple advantages over their competitors.

LICENSING OPPORTUNITIES

INNOVATION

Improve your current product offerings with innovative patented technology that can be used in conjunction with bluetooth capabilities on Android and iOS platforms. Give your product value-added features such as: Illumination, Customization, Personalization, Heating, Cooling, Dehumidification, Item Tracking, Audio, and much more. FUSE currently has seven (7) granted patents and nine (9) pending patent applications to protect the uses of the broad, functional applications of FUSE technologies.

DEDICATED PARTNERSHIP

Our team is dedicated to helping you achieve your goals. Utilizing our patented technologies, we will help you design your product's add-on features. Quality standards and costing will also be assessed to identify potential opportunities for cost savings.

GLOBAL RESOURCES

We have established extensive domestic and international vendor relationships covering a variety of industries, including: Engineering, Cut-and-Sew, Metal Stamping, Electronics, Decoration/Dipping, Plastics, Assembly and Final Packaging.

MOSSY OAK BECOMES MASTER LICENSOR OF ALL FUSE INTEGRATED TECHNOLOGY

Mossy Oak is excited to announce a unique partnership with FUSE Integrated Technology, making Mossy Oak the master licensor of all of FUSE's patents for use across various product applications. The activation of this partnership will provide FUSE Technology on a variety of Mossy Oak-branded products in the hunting, fishing, and outdoor lifestyle markets.
