ELITECITY NFTS

Experience the power of the Elite Gods with our exclusive NFTs! These rare tokens will grant you access to the most coveted tokengated areas in the metaverse, all owned by Elitecity. As the metaverse expands, your NFT will also grow in utility, providing you with endless possibilities.

Not only are these NFTs loanable, allowing you to share their power with others, but they can also be staked for even greater benefits and drops. And if you're a creator looking to make a name for yourself, owning an Elite God NFT will give you the ability to set up shop in any of our 350+ EPL locations on land owned by Elitecity in Earth 2 when E2V1 the 3D metaverse world

Having trouble finding NFTs in your Opensea profile? You may need to 'unhide' them.

Note: NFTs minted on the polygon chain are newer, more efficient ERC-1155 tokens that Metamask is working on supporting. In the meantime, use Opensea to view them.

THE ELITE ARISTOCRATS

The Elite Aristocrats are here. Elitecity is a metaverse city in Earth2.io, Decentraland, the Sandbox and Overline Network. These NFT passes will grant access to token-gated land and exclusive experiences built for founder and/or high net worth social networking (E2 EPL access will include luxuryevents, elitecityentertainment, millionaires, millionairesclub, fortune100, fortune50, businessleaders, politicians, aristocrats, highiqsociety, millionairedating, datingservices) locations in Earth2 and to future experiences in The Sandbox, Decentraland and Oland for vibrant and exclusive social networking experiences. These passes will also allow VIP free entry into any areas that may require entry fees for any events organized or hosted by EliteCity in the future.

THE ELITE GODS

◆

ELITECITY HEYMINT

These are the Elite City God NFTs. They will grant access and membership to various future areas and experiences within the metaverse lands owned or operated by EliteCity. These NFTs are loanable and stakeable for future benefits.

These NFTs are minted on the polygon chain so you incur inexpensive gas fees as compared to the Ethereum chain.
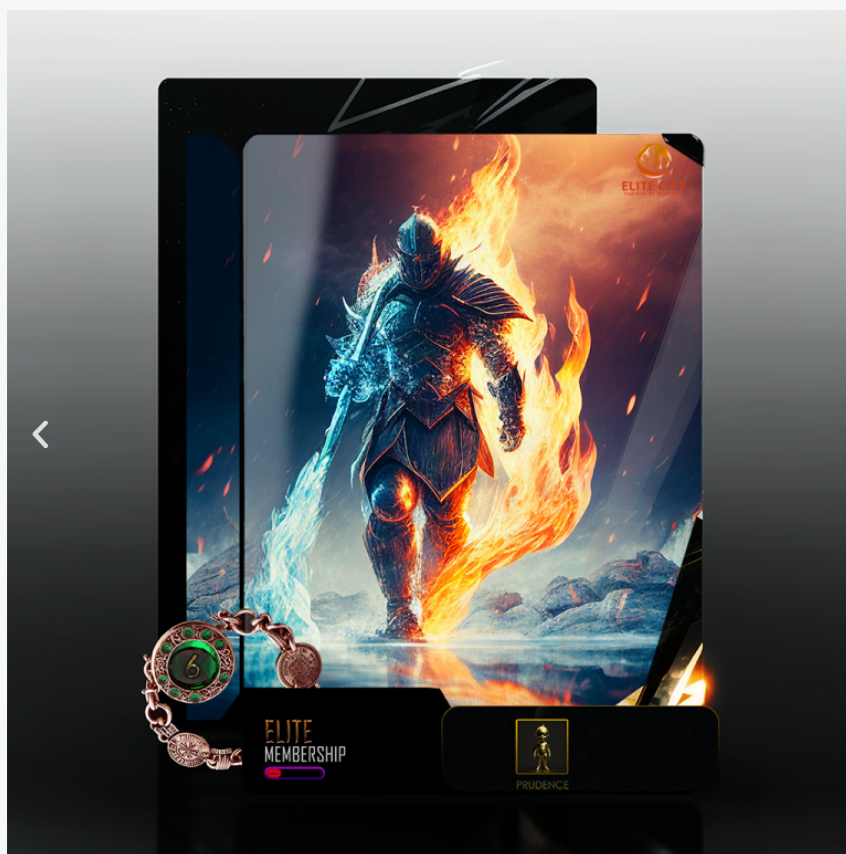

The Gods are helpful guardians of EliteCity.

Each God has a **Charm**, which is one of:

- Hound
- Dragon
- Horse
- AI
- Liberator
- Redeemer
- Punisher
- Defender
- Temperance
- Justice
- Prudence
- Fortitude
- Crown

There are 6 ultra rare God NFTs out of the 10,000 that are each one of a kind collectibles.

If you were gifted the NFT, you'll most likely have to check your 'hidden' section in Opensea to find them. (Profile ->More–>Hidden)

HOW DOES THE LOAN FEATURE WORK?

The Loaning feature allows holder to loan their NFTs to other users. Meta Angels pioneered this concept by allowing their holders to loan their NFTs to others so that people who can't afford their NFTs can get their benefits by borrowing the NFT.

While loaned NFTs will be transferred to the borrower's wallet, owners can always retrieve their NFTs at any time, and loaned NFTs cannot be sold or transferred.

HOW DOES STAKING WORK?

Staking feature allows holders to stake their NFTs. Our staking implementation is similar to Moonbirds' nesting, and does not require the owner to transfer their NFT to another address in order to stake it.
