

BETTER BUSINESS PHONE SERVICE

RELIABLE AFFORDABLE CONECTIVITY

Nexel Technologies Proposal

Agile and Affordable Business Phone Service

Nexel Technologies offers a cloud-based telecom solution that leverages state-of-the-art “VoIP” (Voice over Internet Protocol) technology that can save your business as much as 40 -80% of the cost of a traditional phone system.

Affordable Connectivity

All of your calls are connected through the internet, which means you and your staff can make and receive calls on any phone in any location. Simply forward phone calls to any off-site phone, and stay connected to your business and your customers.

Nexel Technologies Benefits

- **Secure Connection** - Save money, improve productivity, with advanced reliable connectivity, leveraging our secure next-genVOIP platform.
- **Affordable Plans** - We have plans to fit every budget and business application. Whether your business has 3 phones, or 300, we can save you money.
- **Keep Your Existing Device** - Our system integrates with all current phone systems and PBX equipment, its simple and affordable to switch.
- **No Down Time** - Our skilled technicians and our simple interface, will have you up and running in no time.
- **Robust Features** - You will find all the features you expect from a high-end business phone system, at half the price!
- **Unparalleled Service** - We are dedicated to personal service and reliable customer support whenever you need to experience The Nexel Advantage.

Virtual PBX

With our “Virtual PBX” feature, our cloud-based phone system offers you all the telephone applications you would expect in a high-end business telecom system, such as: voicemail, routing calls to specific departments, conference calling, and more! All without costly hardware or IT support. All you need is an internet connection!

Transitioning to the cloud is easy. There is no need to buy any new handsets, routers or hardware. Our system integrates with any existing phones, even your employees' smartphones. When it's time to upgrade, no need to schedule an appointment with a technician, or pay exorbitant fees. You can manage the system completely on your own, and make any changes or updates to your system in real time, from anywhere with an internet connection.

However, should you need help, our customer support is available 24/7!
