

# SOLARIS

## WELCOME TO SOLARIS

### Our Vision

Solaris Farms aims to be a leader in large-scale Cannabis greenhouse cultivation. To that effect, Solaris has gathered a team of top industry professionals focused on using the natural power of the sun in state-of-the-art automated greenhouses dedicated to efficient uses of power and resources. Our greenhouses focus on organic cultivation using repeatable and scalable processes, automated through sensors and delivery systems, with associated data mining and management reporting.

Our facilities target cutting edge strains with top concentration for dispensaries, as well as, refining end-user products in conjunction with our exclusive Nevada franchise with the national brand Huchubest by The Green Solutions, consisting of some top product lines.

## OUR MISSION

Harness the natural power of the Sun, providing growth and nutrition to help heal our bodies and enrich our souls.

## OUR BACKGROUND

Solaris partners have roots in numerous other states, with experience in numerous industries including finance, real estate, medicine, technology and bio-tech. Prior industry projects include the highly respected Los Angeles Compton, which has the reputation of providing quality medicinal products to bona fide patients in real need of medical assistance. As one of the leading local businesses in the Las Vegas area, we have established lasting supplier, partner and customer relationships throughout the years. We believe that all of our customers deserve the highest level of service and product at the lowest cost, and we are committed to providing just that.

## OUR SERVICES

### Incubation

In partnership with Hydra, we have created a unique incubator of award-winning innovators designed by our clients for our patients, with the mission of developing, not just unique delivery methods, but new industry standards. As an example, one Hydra project includes a lab that focuses on creating low cost, high quality synthetic Cannabinoids with predictability, scalability and consistency.

### Facility Design

Solaris provides select customers site planning and design of greenhouses services and consulting services related thereto. Notably, Solaris has developed a unique proprietary low-cost state-of-the-art high-tech greenhouse design capable of monitoring optimal indoor conditions in extreme outside climates such as the ones present in the Nevada desert. Solaris partners with Chinese as well as US greenhouse manufacturers and suppliers to provide the materials, and if needed, with local construction partners to provide the labor and oversee construction services.

### Management Services

Solaris has developed a highly automated, business-process driven cultivation approach. With corporate documents, systems automation, data mining and management reporting, Solaris can provide an S&OP level management approach to the wild-west of Cannabis cultivation. In a domain notorious for its lack of maturity and organization, Solaris provides a rare level of professionalism and integrity. Solaris can help you get started, can problem-solve your existing facility, or can help you grow and scale into a large business in the tens or even hundreds of thousands of square feet as needed.

## GET IN TOUCH

Solaris is committed to exceeding your needs. Questions, comments or special requests? We'd love to hear from you, so don't hesitate to reach out today.
