

Remarks

In the Office Action that issued on March 22, 2019 for Applicant's U.S. Application Serial No. 88/236,059 for IMDB (the "Application"), the USPTO suggested certain amendments to the Application's specifications of goods and services. The vast majority of Applicant's amendments to the Application's specification of goods and services are addressed elsewhere in the TEAS Response to Office Action form. However, Applicant respectfully submits the following comment regarding one (1) of the applied-for goods that was identified in the Office Action as requiring greater specificity. For the reasons set forth below, Applicant respectfully requests the PTO to consider approving the following description of goods as originally drafted.

Class 9

- The USPTO requests that Applicant identify the specific electronic devices by common commercial name that referred to in "portable and handheld electronic devices for transmitting, storing, manipulating, recording, and reviewing text, images, audio, video and data, including via global computer networks, wireless networks, and electronic communications networks and electronic and mechanical parts and fittings thereof." However, "portable and handheld digital electronic devices for recording, organizing, transmitting, manipulating, and reviewing text, data, image, and audio files" is an acceptable description of goods in the USPTO's ID Manual without the proposed language. Therefore, Applicant respectfully submits that the current description should be acceptable under current examination guidelines.

Should the USPTO have any questions or comments, please contact the Attorney of Record.
