

**Technology That Makes
School Trips Safe & Simple**

Experience

Addressing the Needs of Educators

Travel and experiential learning are invaluable when it comes to the development of young minds, and there continues to be a growing demand amongst students, parents, and educators for real-world learning experiences outside of the classroom.

Experience is an end-to-end technology platform for school trips that connects everyone involved—from teachers and students—to parents and vendors. We standardize and automate all of the planning by allowing you to pick a pre-built itinerary or create your own in minutes. Within the app, students can register for their trip and parents can sign permission slips and necessary paperwork.

Our software connects everyone through their mobile devices and stays with you throughout your whole trip. You can locate students on a map using a digital geofence and even assign students to chaperones on the go. We have covered the details both big and small, so you can focus on creating an unforgettable experience for your students.

Connecting the dots in one integrated platform.

⌚ Save time

- We will automate the setup and registration for you—no more fussing with forms
- Share itineraries within your district so teachers can repeat a trip at a click of a button

📍 Improve safety

- Track students in real time and assign between chaperones
- Send SOS signals to all other students and staff via the app

👤 Make it easy

Enter elements of trips just once:

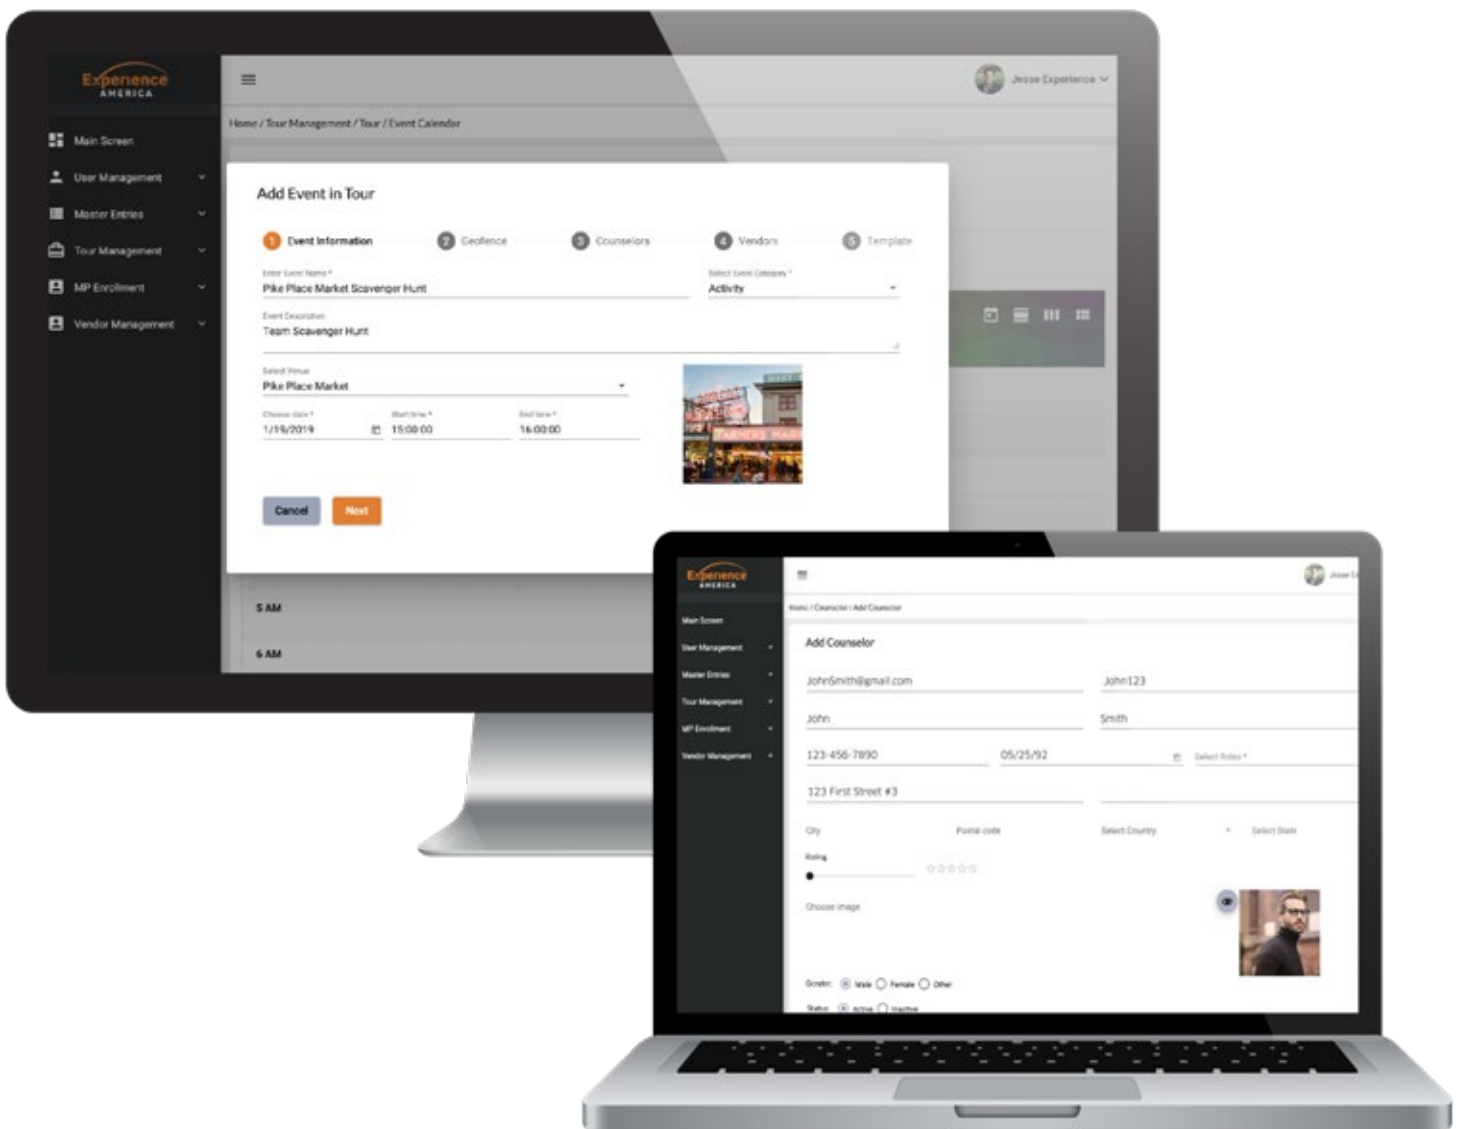

- Events
- Venues
- Activities
- Workshops
- Tasks
- Vendors

Build a Trip in Four Easy Steps

Step 1: Create Activities

 Add events

 Add chaperones

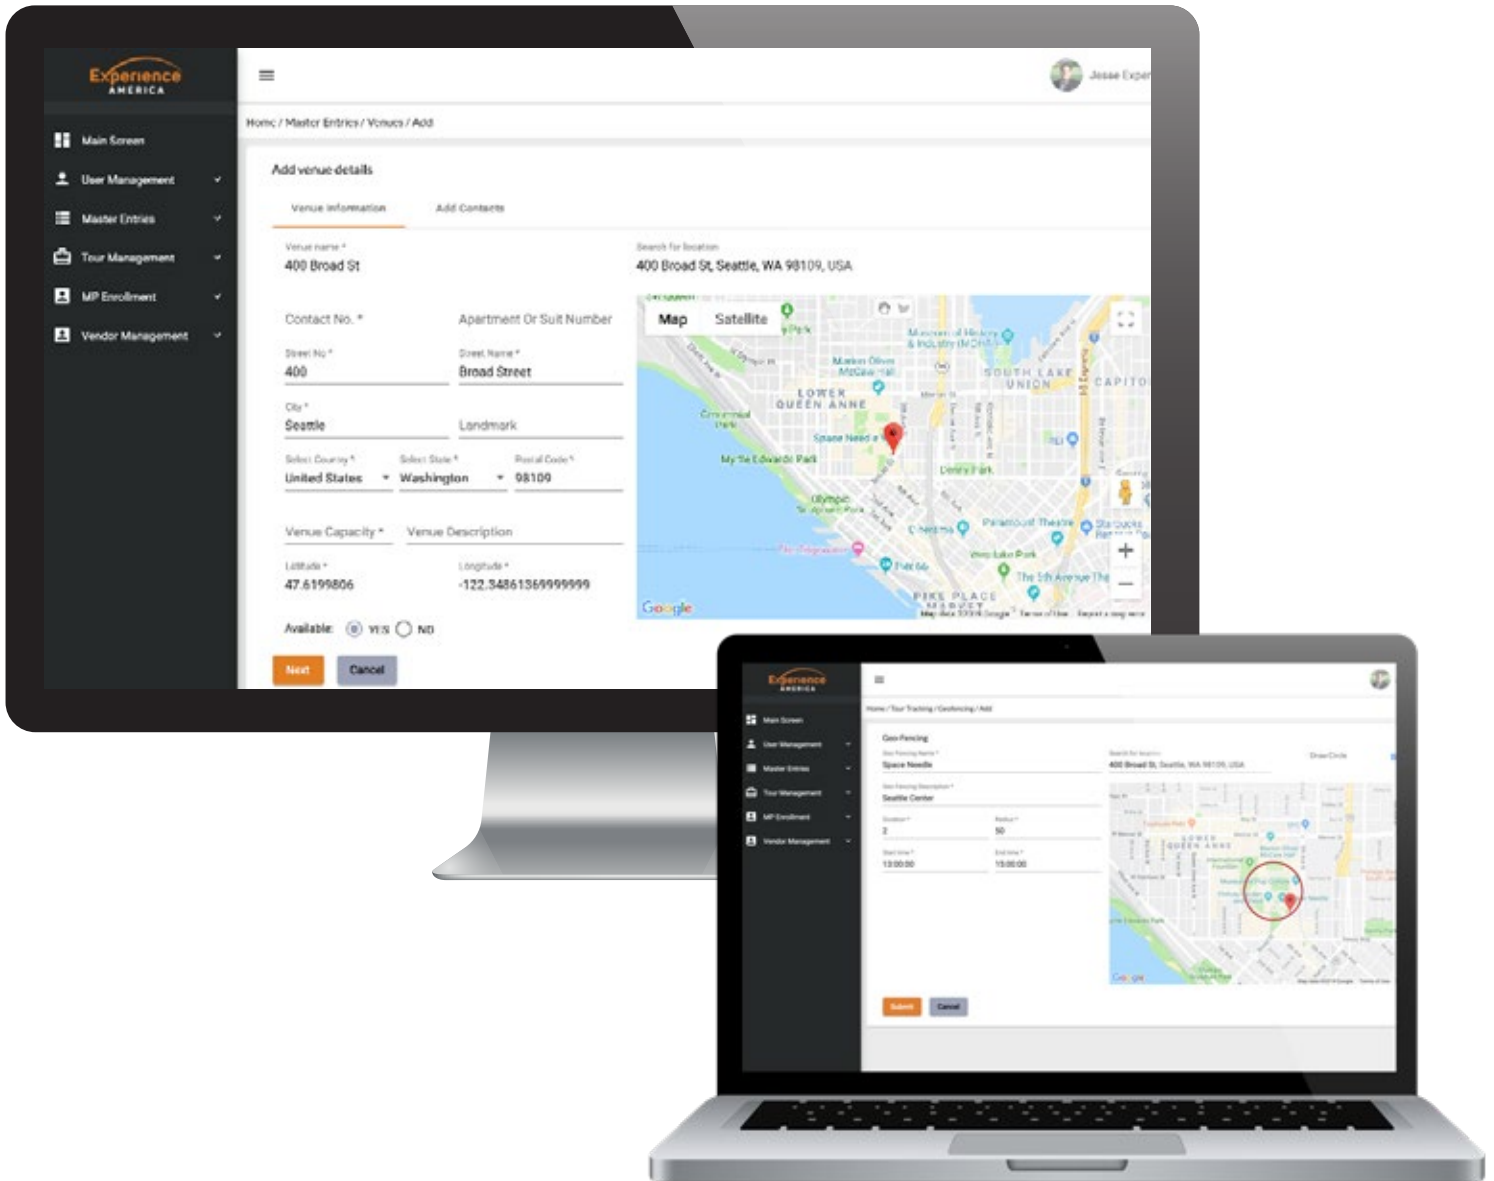

Establish venues

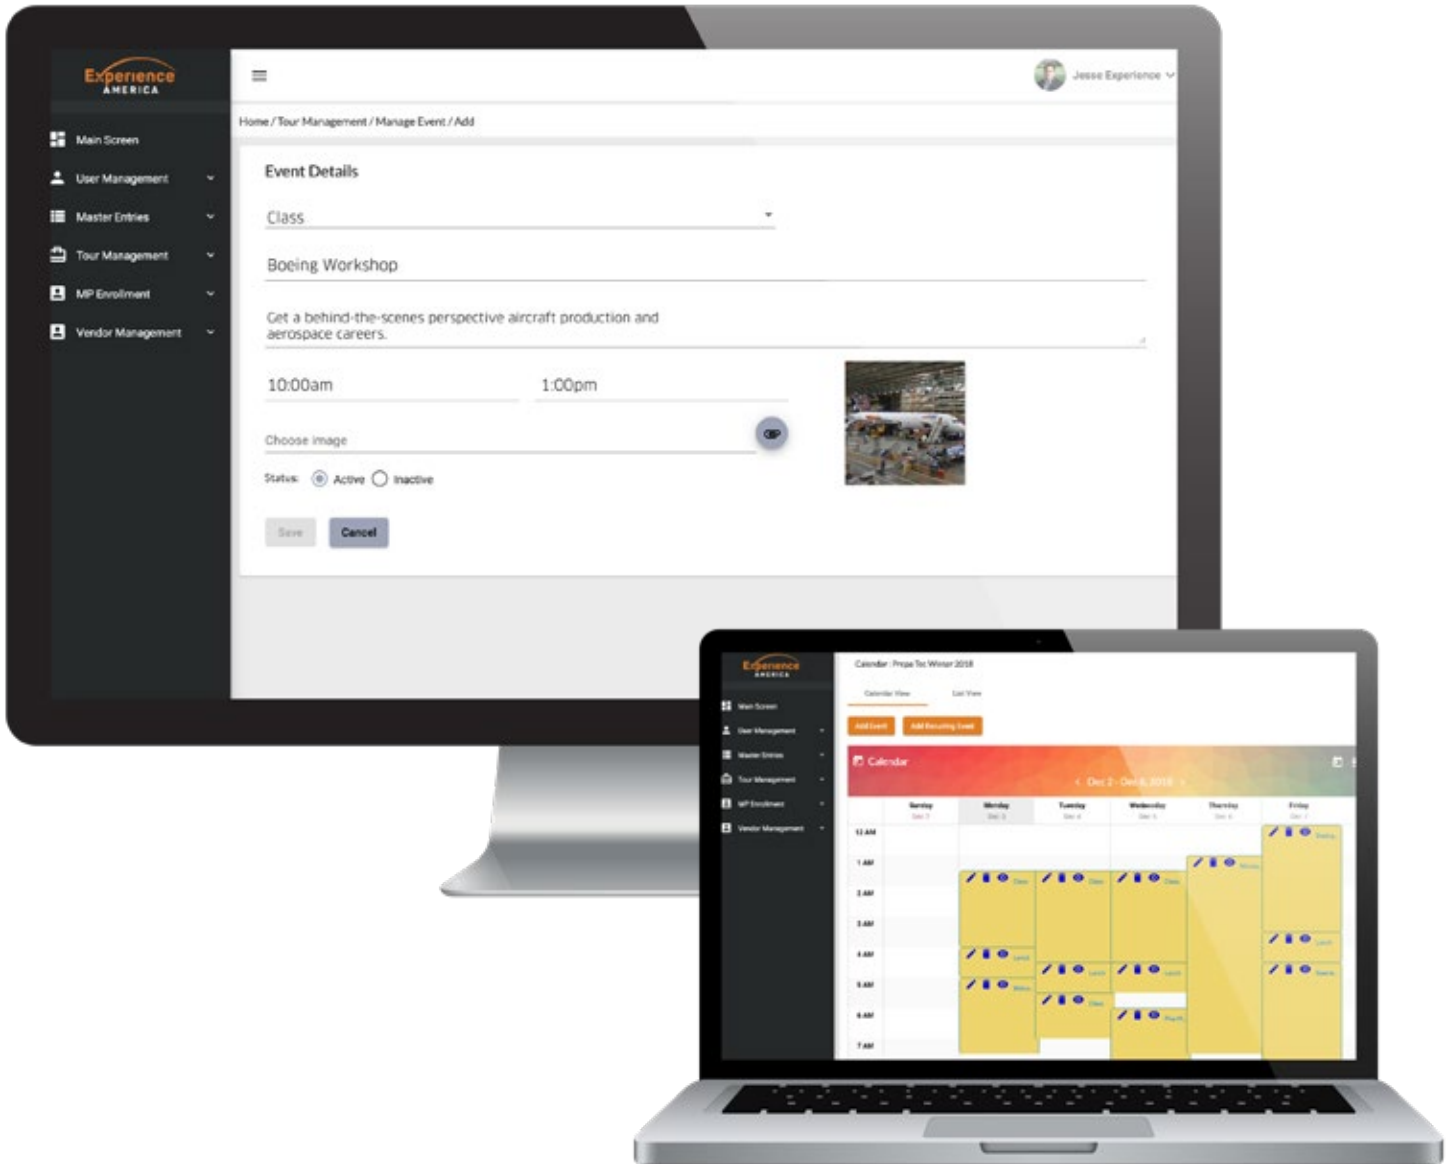

Determine geofence

Step 2: Build Itinerary

 Add events to calendar

 Review itinerary

Step 3: Register Students

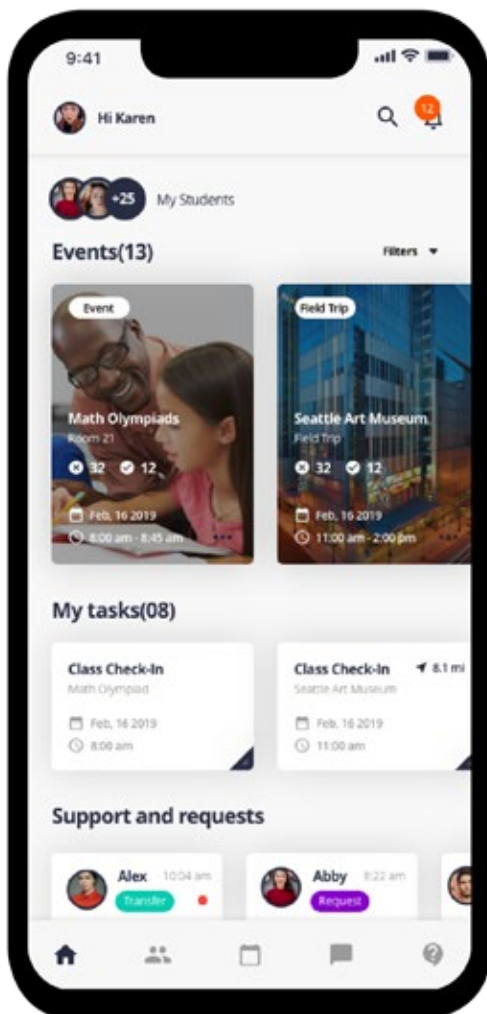

- Register online, in mobile app, or Excel upload
- Acquire parent signatures

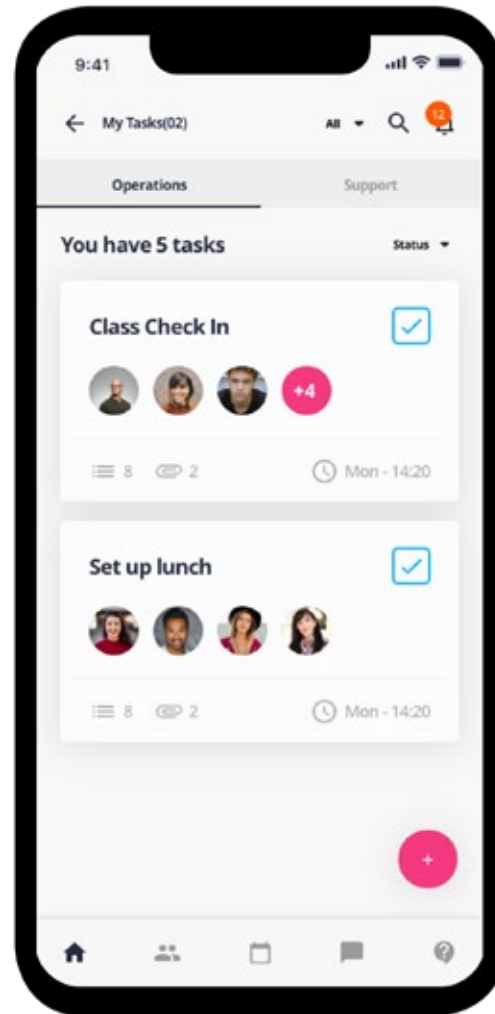

Step 4: Travel Through the App

Manage chaperones, events, students, and tasks in real time

- See which chaperone is responsible for which students
- View and organize current and upcoming events
- Organize time-based tasks for chaperones

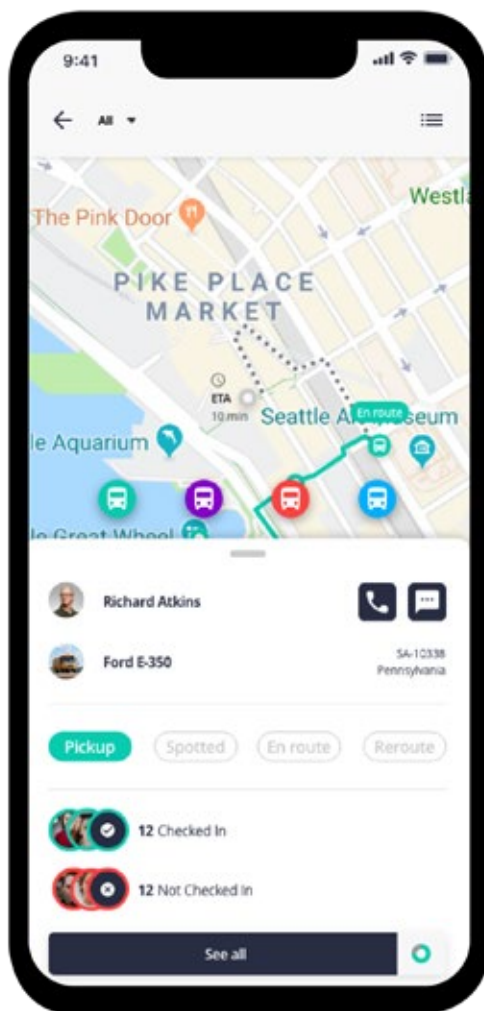

- Check in on task progress
- Group leaders create and assign new tasks
- Participate in internal chats between groups

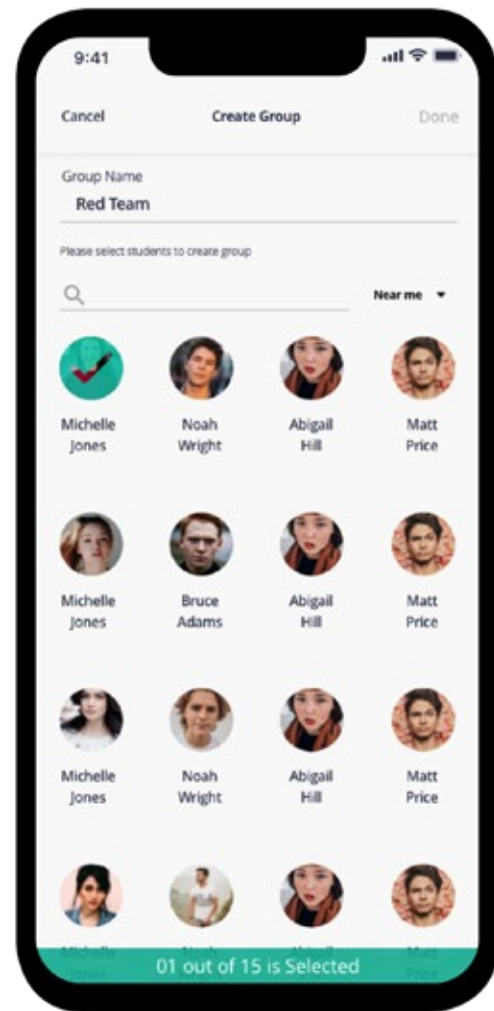

Step 4: Travel Through the App

Manage chaperones, events, students, and tasks in real time

- Manage multiple buses at once
- Change routes on the go

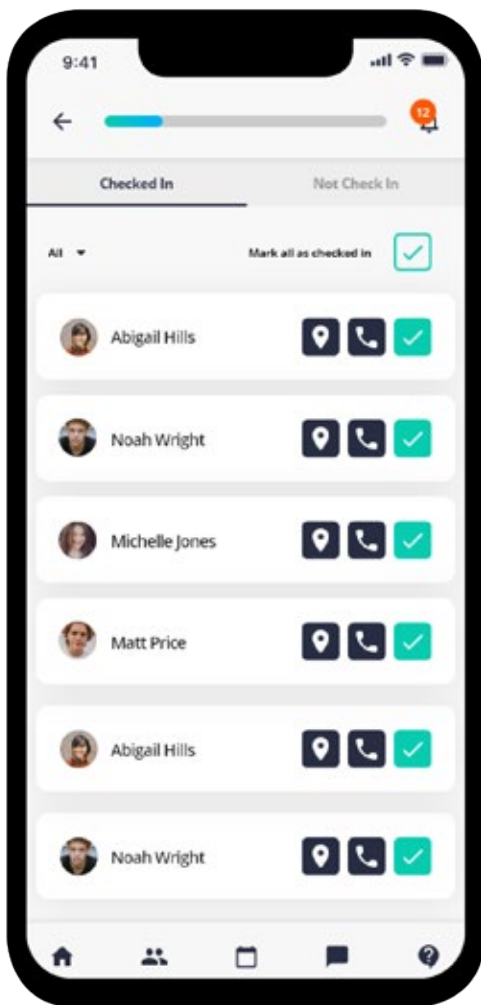

- Create student groups
- Assign students to chaperones

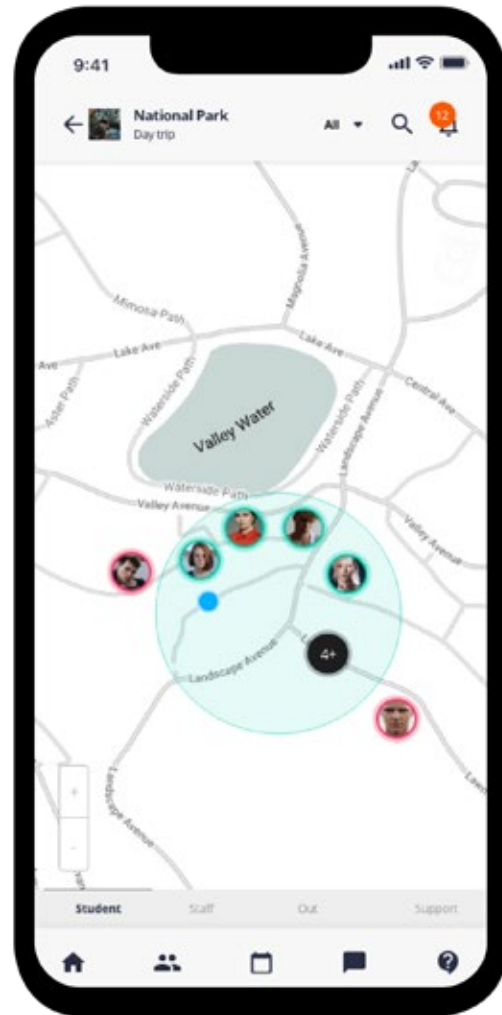

Step 4: Travel Through the App

Technology that enables you to access students' information quickly

- Take attendance
- Locate missing students

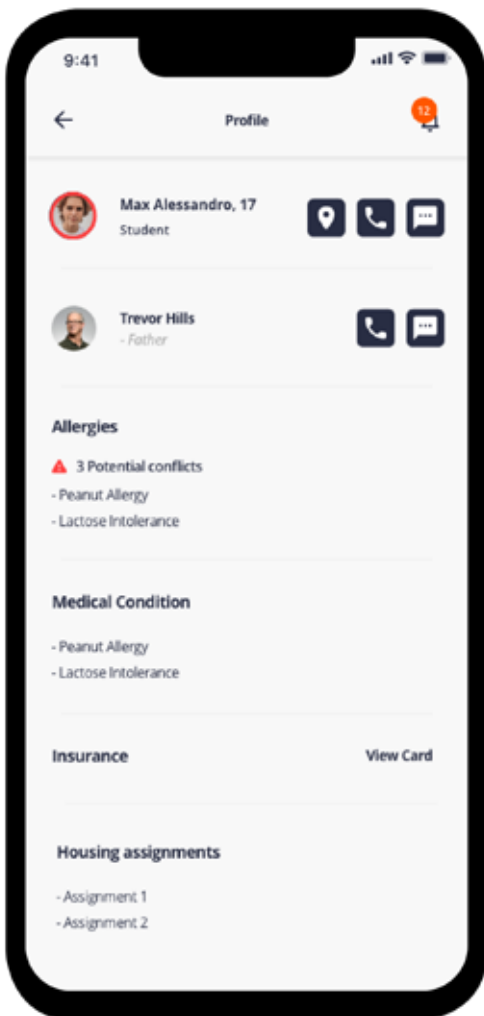

- See where students are
- Get alerts when students are outside of the geofence

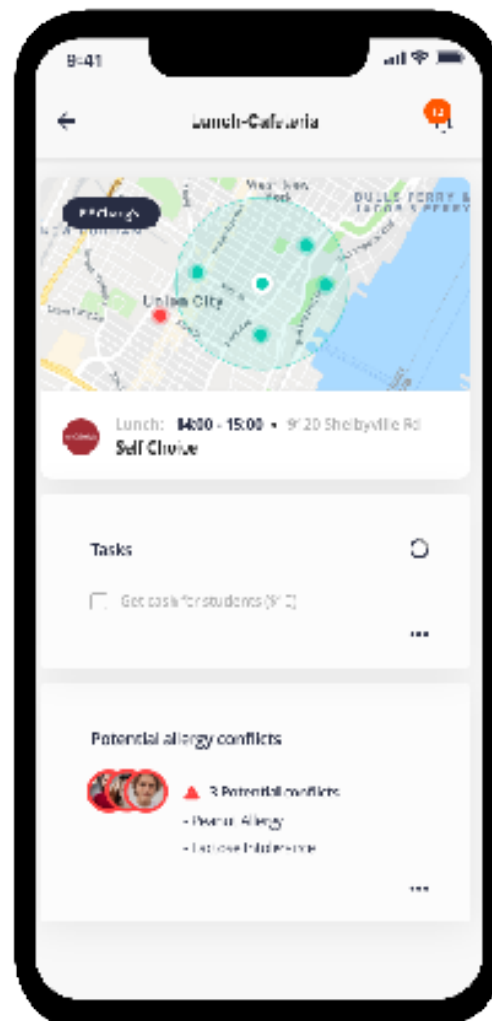

Step 4: Travel Through the App

Technology that enables you to access students' information quickly

- Access allergy and medical information, and insurance and medical authorization forms in an instant
- Retrieve parent contact information

- View allergy risks with each meal
- Receive prescription reminders

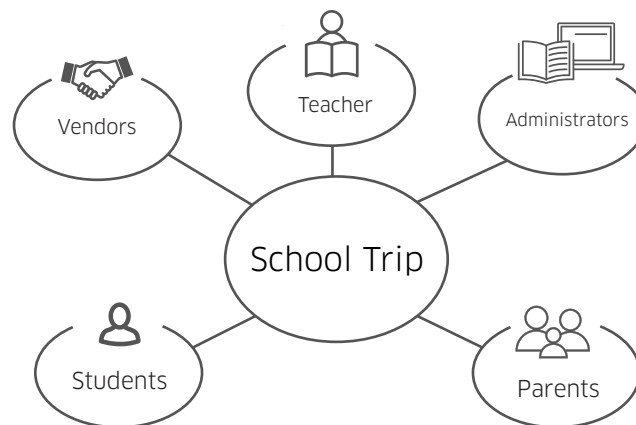

Privacy and Security

Your data is our responsibility.

- We will never sell data to any third party.
- We use the latest encryption to ensure safety and privacy is maintained at all times.
- Upon cancellation of services all data will be deleted within 90 days in compliance with GDPR.
