UKA North America LLC

UKA is continuing its expansion. After opening four new offices in Germany last year, it entered the US market in 2017. UKA North America LLC (UKA NA), has its office in Stuart (Florida). UKA works with American business partners and experienced employees on promising wind energy and PV projects in the US. A close cooperation with leading turbine OEMs enables UKA to provide the US market with profitable projects.

UKA NA safe harbored production tax credits (PTC) in order to qualify wind projects with a volume of around 600 million US dollar.

UKA's range of services

UKA Group is a reliable, financially-sound partner for the optimal development, financing, construction, and operation of renewable energy projects in Germany. As a single-source developer and EPC contractor, UKA Group offers a broad range of services for customers and business partners - from planning to implementation.

- EPC: ENGINEERING, PROCUREMENT & CONSTRUCTION

UKA Group uses its expertise and many years' experience to develop high-performance renewable energy systems in the megawatt range. Thanks to UKA's expertise, including tax knowledge, approval and construction management experience, UKA NA is in a position to create a comprehensive project that includes planning, design, procurement, and installation – with project experience that exceeds that of the typical developer or EPC scope of the work.
