

# Salvo 12

Silence Your Shotgun

## PRODUCT OVERVIEW

Everyone who owns a gun owns a shotgun, but until SilencerCo stepped in, most of them had never been suppressed. The Salvo® 12 is the only commercially-viable, modular, hearing safe shotgun silencer on the market. Designed to operate with most pump action and semi automatic shotguns and almost all commercially available ammunition, at its full length of 12" the Salvo 12 brings sound down to 136.8 dB at the muzzle with #7 shot. Configurations of 6", 8", 10", and 12" allow the end user to customize the Salvo 12 for sporting clay, waterfowl, turkey hunting, home defense, and many other applications and accept the appropriate tradeoff of size for sound reduction.

### MODULAR

*Adjust to a length  
right for your host.*
