QUICK RESPONSE SYSTEM - SALVO™

\$379.99

★★★★☆ (2 reviews) [Write a Review](#)

SKU: QRSS

PLEASE USE THE CUSTOM BUILD TAB TO BUILD YOUR BELT SYSTEM: Required

DESCRIPTION 2 REVIEWS

The HTC Quick Response System - Salvo™ has been designed to maximize a shooter's available ammunition for duty or for anyone who would simply like to spend more time shooting and less time reloading magazines at a training course or on the range.

It comes standard with:

- [Vantage™ Holster](#)
- M4 Mag Stacker™ Panel in one of the following configurations:
 - 1 [Dual Pistol Mag Holder](#) and 3 [M4 Rifle Mag Holders](#)
 - 2 [Dual Pistol Mag Holder](#) and 2 [M4 Rifle Mag Holders](#)

[Tactical Cobra Belt™](#)

If your requirements dictate something other than these standard configurations, such as for an ambidextrous shooter (for instance, a left-handed pistol shooter who runs their long gun right-handed), contact us, and we can suggest a setup to meet your needs.

The components can be tailored to the user's preference regarding the orientation of magazines and where they are positioned on the belt. The modular design of the QRS Salvo allows it to be easily configured for different course or training requirements or operational needs. If your requirements dictate something other than these standard configurations, such as for an ambidextrous shooter (for instance, a left-handed pistol shooter who runs their long gun right-handed), [contact us](#), and we can suggest a system to meet your needs.

The QRS Salvo comes standard with a [Tactical Cobra Belt](#). The two-piece design holds your gear securely in place while allowing for quick attachment and removal. We recommend adding 1" to an [over-the-pants](#) measurement for sizing.

Additional Options:

Get two belts in one - upgrade your underbelt to HTC™'s new [Everyday Tactical Belt™ \(EDT™\)](#). The EDT provides a sturdy and comfortable everyday carry platform while also providing a quick-attach foundation for any HTC modular gun belt system.

If your pistol includes custom features or aftermarket items, please let us know so that we can incorporate that into our molding process. Not all aftermarket features may be accommodated, but RMRs, threaded barrels, and suppressor sights are no problem.

DOES NOT COME STANDARD WITH THE PADDED CRUX BELT
