THREE DECADES OF EXCELLENCE

Precision Textiles is a pioneer in the production, design & distribution of high quality CFR 1633-compliant residential, institutional and commercial textile components, as well as laminated solutions.

With ISO 9001:2015 certification, vertically integrated production in its 210,000 sq. ft. state-of-the art New Jersey headquarters, three Asian factory joint ventures, and a global network of 38 operation centers; Precision Textiles' product solutions can seamlessly integrate into any product construction strategy. Our award-winning factories & facilities feature the latest technology in machinery, resulting in flawless product development from fiber to finish.

Founded in 1987 under Precision Custom Coatings (PCC), and in 2004 establishing Precision Textiles to serve OEMs and industry-leading Automotive, Mattress / Bedding & Filtration partners, we have been committed to delivering superior quality, outstanding service, flexibility & innovation to our valued clients. Precision Textiles offers a vast array of wovens, knits, nonwovens, specialty fibers & laminations which are sure to make you stand out amongst your manufacturing competitors.

Providing Solutions Across Industries

Apparel | Automotive | Bedding + Mattress | Filtration | Footwear | Home Goods + Personal Care

As a key supplier to a range of major industries worldwide, Precision Textiles has established itself as an integral partner with many of the world's leading companies. This is the driving factor which pushes us to advance as cross-industry experts in the science & application techniques of nonwovens. Our extensive knowledge in coating, lamination & multi-layering technologies has lead us to pioneer the development of a diverse line of unique & creative products. With a core product development focus on flexibility, versatility & innovation, we are expertly equipped to produce a multitude of nonwovens in a diverse array of colors, finishes, widths, deniers, and composites.
