

it may not function optimally. We perform a full-body movement analysis to look for imbalances. Then, we have you perform the movements that cause you the most discomfort. Together with Dr. Gautam, under ultrasound we look for scarred and damaged tissue and entrapped nerves which may be the cause of your problem.

Once we have identified the issue, we recommend a treatment plan which is all personalized. At i2i, our motto is to treat you as if you were a member of our family and manage your most important asset - your health. Dr. Gautam cares tremendously about ensuring you leave much better than you came in."

Christian always had the belief that Miami would become a hub of healthcare innovation - and, innovative they are indeed. Just ask their roster of clients which include Peak Performance Coach Tony Robbins, Triple Crown Winner Miguel Cabrera, Red Sox Legend David Ortiz, WNBA Standout Candace Parker, GM Philadelphia 76ers Elton Brand, Former Miami Heat Tyler and Joe Johnson, CEO of Douglas Elliman Florida Jay Parker, and many other active pro athletes, celebrities and influencers. With plans to expand nationally and internationally, Christian who moved to Miami just four-years ago and has invested in over 30-healthcare businesses has never been so impressed by a medical procedure in his life. Christian shared that when "I sprained my wrists from a trampoline fall, all of the 'top' doctors put me in a brace, immobilizing me and ultimately making my issue worse. Months went by and I wasn't seeing any progress. Then, Dr. G. treated me, I was able to do push-ups again in two days. He completely changed my view on medicine and I'm grateful to have the opportunity to help share his amazing gifts with the world!"

Taking between thirty minutes to an hour for the first appointment, i2i is offering all Sunset Islands and Cocoplum residents a free consultation, valued at one-thousand dollars!

Please fill out the form online at www.i2i.md and call 1-305-239-9117 to book. Please mention you are a resident.

health and visualize scarred and damaged tissue and entrapped nerves. Rather than an invasive surgery, RELIEF™ frees nerves from entrapment and remodels and restores the scarred and damaged tissue back to its natural state. FDA registered and World Anti-Doping Agency (WADA) approved growth factors, collagens, extracellular proteins naturally found in human placental tissues are administered during the process. The patient is awake the whole time and with a local numbing agent this minimally invasive and natural treatment has no down time! In fact, patients are encouraged to get back to their favorite athletic activities the same day!

Christian shares the whole process is quite simple. "You come in for a consultation which consists of two things. First, we look for the root cause. *We don't treat symptoms - we fix the root problem.* We think of the body as a car -- if it is not properly aligned
