## Vista Wolf A/E - Gloss Natural w/Case

The Vista Wolf features a gloss finished, flamed maple bound, Grand Concert body with choice Koa back and sides for enhanced tone and projection. Precision fitted with a hand-shaped 25 scale Mahogany neck and capped with a smooth, Pearl Moon Phase inlaid Ebony fretboard the Vista Wolfs feel, playability, and stand-alone acoustic sound are nothing short of inspirational. The Vista Series Wolf model showcases a skillfully crafted top, made from attractive tone-woods that bring its unique panoramic image to life. Handmade from a combination that includes Paduk, Bird's Eye Maple, Koa, and Flame Maple, each guitar is a completely unique work of art. Once plugged in, the Vista Wolf takes off in yet another sonic direction. Owing to a Fishman Presys+ (PSY-201) preamp/tuner, the Vista Wolf offers clear, strong, natural acoustic sound on stage even when going against dense instrumentation. Whether plugged-in or not, the Vista series incredibly full tone, pristine clarity, and unique visual presence make it the ideal instrument to make your musical statement. The Vista Series blurs the line between the world of fine art and the art of advanced acoustic guitar building.

It is stunning and so is the guitar case that came with it. It looks like it is hand tooled leather! Simply beautiful. It played beautifully right out of the box and the sound was amazing. I plugged it in...[Read More](#)
