Hiboy S22 Electric Skateboard

★★★★★ 59 reviews

The Bull / Flying Fish
Jograceo from S11, Hiboy's first budget maple skateboard with a polished frame, high-end performance and neat riding experience. Its red & black design is inspired by the sea fish California sheepshead.

Good board

I like it. When you all design the next one focus on making the board wider and the steering lighter it is a bit scary at high speed.

Clay

Awesome!

This thing has power. I'm middle aged and bought this thing because I'm keeping up with the Jones but I can't regret it. It's fast. Very fast. Too fast for me but the power settings help. I find the lowest setting to be plenty for me as even on the lowest setting this thing is cooking around 10mph. The remote is very responsive and the brakes are great. Or at least as great as they need to be in order to not throw you off the front. Battery life is great. Wheels are smooth and it rolls over pretty rough items without issue. Such as acorns. It'll pop those without issue. All I all I recommend if you want something to commute quickly and quietly.

Man this board is nice!!!!

Seriously has some mean speed and good carving! I started using this model 2 weeks ago and I'm in love! I use it literally every day and everywhere I go! I really recommend this brand and their product!
