

EXHIBIT A

Symphony™

Symphony is a rapid deployment, high volume, high flow-rate 5 french centesis kit that includes the most commonly used components for these procedures. Symphony was developed with input from over one hundred hospitals and clinicians to create the ultimate centesis kit that achieves some of the highest possible fluid drainage volumes and flow rates available on the market today.

Included in each kit is:

- 1,000 ml evacuated suction bottle with sterile drain line
- Sterile packaged 5F x 10 cm centesis catheter with echogenic needle and porous plug
- Sterile packaged fenestrated drape, 60cc syringe, patient label, 22G needle, scalpel and syringe cap.

Additional Evolution® evacuated bottles can be purchased separately should drainage volumes exceed 1,000 ml.

Product Code	Description	Units/Box
CTK-5	Symphony Centesis Kit	8
