

**Oxygen Delivery Made Simple**

**You'll have oxygen available 24/7...  
even in a power outage.**

- A Unique & Patented System
- The Purest & Safest Form of Oxygen
- No More Delivery or Storage Problems

**You'll receive unparalleled clinical support...  
designed to meet your exact needs.**

- Educational In-Services
- Bipap and Cpap Set-ups
- Tracheostomy Set-ups & Monitoring
- Respiratory Assessments
- CPR certifications

**You'll derive significant cost savings...  
and recognition for superior care.**

- Delivery Efficiencies & Reduced Energy Costs
- Flexible Billing Options, including Fixed Pricing
- A Reputation for Innovative Patient Care

**It's safe. It's convenient. It's cost-effective.**  
*It's exactly what you've been looking for.*

Providing top quality care for patients with oxygen needs is no small challenge for facilities like yours. Expensive bulk systems with piped oxygen to each patient is simply not an option. And while the alternatives are inefficient and problematic, you've had no choice but to use them.

Until now.

With the creation of the O2Safe System, your outlook got considerably brighter. This innovative system not only eliminates virtually all of the problems you encounter with traditional systems, but it actually improves the quality of patient care—and saves you time and money in the process.

- ✓ Deliveries are less frequent and don't require your presence.
- ✓ Delays in admissions go away because you'll always have oxygen on premises.
- ✓ You won't have to store volumes of full oxygen tanks—and lose some of it to evaporation.
- ✓ Your electric bill will drop dramatically because our units require no electricity.
- ✓ The oxygen patients receive in their rooms is of a higher quality...and units run cool and quiet, so patients also sleep better.

You'd expect a system that does all this to cost more than those being used today. But, in fact, it could save you up to 25% when all the efficiencies are tallied.

And the benefits don't stop there. You can also count on full technical support... as well as clinical support from our team of licensed respiratory therapists. Whatever you need, we're here for you. And we can tailor programs and services to meet your exact needs.

NFPA Compliant

# THE O<sub>2</sub> SAFE TANK THE HEART OF THE O<sub>2</sub>SAFE SYSTEM

The tank stores up to 160 gallons of USP grade liquid oxygen right on the premises.

A built-in telemetry unit tells us when your tank needs refilling— which is done from outside your building.

**O<sub>2</sub>Safe Base Units deliver 99.9% pure oxygen to patients in their rooms.**

Units require no electricity... run cool and quiet... and are easily refilled by members of your staff.

**Lightweight O<sub>2</sub>Safe Portables allow patients to move around freely.**

Our portables last twice as long as the traditional high pressure tanks. They're also safer and easier to refill; no regulators need to be changed.

## O<sub>2</sub>Safe Solutions BENEFITS CHECKLIST

- ✓ Innovative, patented design
- ✓ Pure liquid oxygen stored right on premises
- ✓ Units run cool & quiet
- ✓ Energy-efficient—no electricity required
- ✓ The safest way to deliver oxygen to patients
- ✓ Deliveries are less frequent & non-disruptive
- ✓ Units and portables can be filled by your staff
- ✓ Less product loss due to evaporation
- ✓ Comprehensive technical & clinical support
- ✓ Efficiencies result in savings up to 25% a year.

For the long-term or the short-term...

## We can provide the right combination of equipment to meet your needs.

Liquid Oxygen O2Safe Tank  
Liquid Oxygen Base Units  
Liquid Oxygen Portable Units  
Oxygen Concentrators  
Gaseous Oxygen Cylinders  
Industrial Gaseous Cylinders  
Conserving Devices  
Nebulizers  
CPAP Units  
Bi-Level Units  
Air Compressors  
Suction Machines  
Pulse Oximeters

If you'd like to know more about what O2Safe Solutions can do for you and your bottom line, just give us a call at **1-800-847-0745**. We'll be happy to meet with you and go over all the details.

*“...A great delivery service.  
They respond when needed—  
even on holidays.”*

## Your Partner in Respiratory Innovation

Technical Gas Products, our parent company, has been a market leader in long-term respiratory care since 1993. But in 1999, when the cutting-edge technology of the O2Safe System was developed, we stepped out way ahead of the pack.

With our patented, state-of-the-art system, O2Safe Solutions redefined the way USP grade medical oxygen was delivered to long term care facilities. Taking an innovative approach and providing a helpful, effective response to our customers' needs and concerns, we have become recognized as the finest service-oriented supplier and responsive business partner with dozens of sub-acute, general respiratory, rehabilitation, and convalescent facilities throughout the northeast.

And we don't use the word "partner" loosely. We literally share in your commitment and responsibility to provide your patients with an unprecedented level of respiratory care that improves their overall quality of life. Likewise, our commitment to you is to provide full technical and clinical support while delivering substantial savings and cost-effective solutions to your facility's oxygen needs.

Our services are comprehensive and our experiences broad, allowing us to design a program to fit your facility's exact needs. A high degree of responsiveness, coupled with our commitment to customer satisfaction, have enabled us to build lasting and rewarding relationships with each of our customers over the years. We look forward to doing the same with you.

For more information, please call: **1-800-847-0745**.
