 🔍 analytically accurate (<http://mustangsampling.com/tag/analytically-accurate/>), modular (<http://mustangsampling.com/tag/modular/>), mustang (<http://mustangsampling.com/tag/mustang/>), sample conditioning (<http://mustangsampling.com/tag/sample-conditioning/>)
 [Add new comment](#) (<http://mustangsampling.com/mmscp/#respond>)

The Mustang® Modular Sample Control Panel (MMSCP) uses innovative technology to deliver a representative sample to an analyzer. The sample is controlled with a regulator and membrane filter to reduce pressure and separate liquid entrainment. A continuous bypass ensures a sample is quickly supplied to the analyzer for optimal performance.

### Features

### Specifications

### Literature

- ➔ Analytically Accurate®
- ➔ Low Volume
- ➔ Bypass for continuous flow
- ➔ Modular & Compact Design
- ➔ Panel replacement w/o disconnecting tubing
- ➔ Plug & Play
- ➔ Direct replacement for new and existing analyzers
- ➔ For use with SpectraSensors moisture analyzers and ABB GC's and others

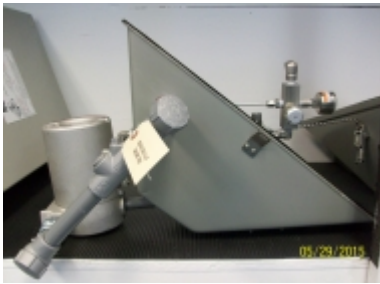

The compact, modular design, facilitates easy maintenance and replacement of failed components. With a small footprint, the MMSCP allows easy retrofitting of existing analyzers in a plug and play format.
