

# Solution

With the growth in popularity of cloud services, companies are increasingly adopting an integrated approach to technology-based innovation in order to increase mobility, improve productivity, make communication more effective and fulfil social responsibilities. Long-gone are the days when purchasing IT equipment just meant buying computers — modern businesses have multi-faceted needs that require a systematic and integrated approach. ASUS provides a comprehensive range of products, all incorporating reliability, information security, and eco-friendly engineering right from the design stage, with exclusive technologies such as embedded security chips and energy-saving processors to ensure optimum performance. Founded on quality and innovation, ASUS delivers all your security, application virtualization, cloud storage, mobile office, and large-scale data retrieval needs, with a wide range of integrated solutions for all types of business.
