Description

The Cochlear™ CR310 Remote Control is a pocket-sized hand-held remote control that allows you to adjust commonly-used functions of your Cochlear Nucleus® 7 Sound Processor.

- Change programs.
- Turn volume or sensitivity (if available) up and down.
- Control audio streaming from True Wireless™ devices.
- Turn telecoil on and off.
- Can communicate with two Nucleus 7 Sound Processors (bilateral) at the same time.
