

CENNTRO

Metro

**The Compact All-Electric
Utility Vehicle For Urban Logistics &
City Services**

Since 2017

Sold 3,600+ Units

Launched 32+ Countries

Adapted to 30+ Usage Scenarios

Metro

CENNTRO

Flexible

Since 2017, METRO has launched in over 32 countries in the world. Metro has performed outstanding localization capability. No matter narrow roads, long-distance delivery, or various service requirements, Metro's robust body (1400mm width), adjustable endurance (120KM or 200KM), and subtle design (multiple cargo bed choices and modification possibilities) ensure its strong adaptivity in different usage scenarios. We have witnessed nearly 4,000 units of Metro's working spaces from a suburban logistics delivery tool, first-aid ambulance, cold chain supplier, golf cart, park patrols, food service vehicle, etc. Other possibilities are still on the way.

Metro	120KM	200KM
Dimensions	3910×1400×1905 mm	
Payload	500 kg	
Cargo Volume	3.8 m ³	
Max Speed	85 km/h	
Range	120km	200km
Turning Radius	4000 mm	
Gradeability	20%	
Acceleration	0-30 km/h in under 6 s	
Braking Distance	40-0 km/h in 7.5 m	
Battery Type	Lithium-ion	
Operation Voltage	86.4 VDC	
Nominal Power	10 KW	
Peak Power	24 KW	
Battery Capacity	13 KWh	26 KWh
Chassis Type	2 WD Rear	
Front Suspension	Leaf Spring Independent	
Rear Suspension	Transverse Coil-over Shock Independent	
Brakes	Four-Wheel Disc	
Tires	175/65R14 Radial	
Bodywork	Reinforced ABS	

Cargo Options
