

An innovative treatment that uses non-invasive vagus nerve stimulation

gammaCore is a safe and effective non-drug treatment

Powerful results without many drug-like side effects

Fast, reliable relief for many adults

Can be used with other medications

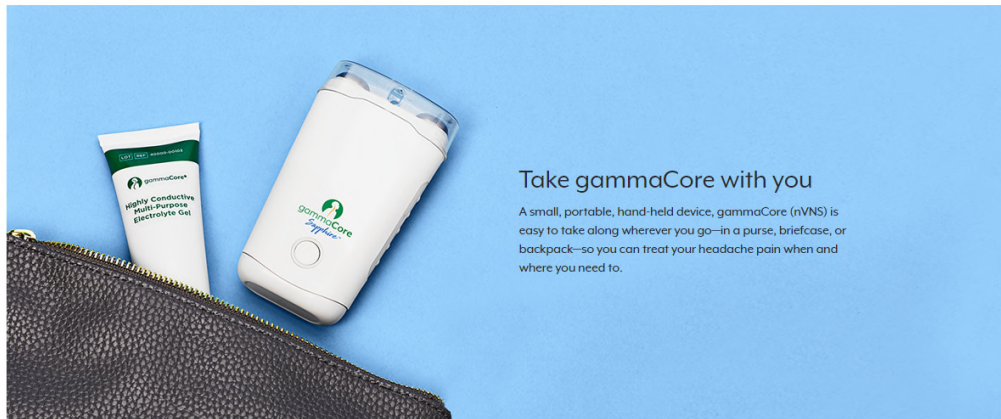

Fewer cluster attacks when used with other treatments

Ability to treat multiple headaches each week

Convenient, portable, hand-held device

Take gammaCore with you

A small, portable, hand-held device, gammaCore (nVNS) is easy to take along wherever you go—in a purse, briefcase, or backpack—so you can treat your headache pain when and where you need to.

Safe and effective for migraine

gammaCore is a non-drug treatment for adults who suffer from migraine pain.
