KRONOS CAPABILITIES

Meat

Kronos is known for our quality meats. Our energetic R&D team created a patent-pending technology that puts specialty proteins within reach to all foodservice segments. This includes regional, seasonal and world cuisine in convenient, heat-and-serve formats.

We process more than 100,000 pounds of USDA certified beef, poultry and lamb per day. Our blending process includes the integration of quality meats with unique ingredients to create exceptional products. We have expanded our processing by creating portion controlled products and fully cooked products to better serve our clients' needs. We can provide you with premium products to enhance your menu.
