- **Increase annual net revenue**

Through the combination of innovative technologies and best practice process knowledge, Baker Tilly's Advanced Revenue Cycle (ARC) platform strives to dramatically improve annual net revenues by removing human error and manual efforts that lead to revenue leakage. This approach provides a new paradigm to managing and controlling revenue cycle activities.
- **Reduce costs**

By utilizing exception based workflow and robotic process automation, Baker Tilly's Advanced Revenue Cycle (ARC) platform has shown that as much as 40 percent of revenue cycle full-time employee costs can be reduced while producing higher levels of productivity and improved outcomes due to the ability to run processes 24 hours a day, seven days a week and 365 days a year.
