Azure Sphere is the easy and affordable way to build products that are innately secure, that continually responds to emerging threats—keeping devices secured over the long term.

The Azure Sphere includes three components, sold together as one solution (components not sold separately):

- Azure Sphere certified MCU
- Azure Sphere OS
- Azure Sphere Security Service

Pricing and support details

Pricing and support details for our first Azure Sphere certified MCU, the MT3620AN. As we add new certified MCUs to our line up, you can expect pricing to vary based on their capabilities and manufacturer requirements.

AZURE SPHERE SKU DETAIL	PRICING**	SUPPORT DETAILS
Azure Sphere MCU model MT3620AN	Less than \$8.65	<ul style="list-style-type: none"> • OS and security service updates supported through July 2031 • Ongoing support (through and after July 2031) of certificate base authentication, failure reporting, and OEM software updates

**Pricing may vary based on volume and other factors determined by our distributor, but will not exceed this published price.
