COVID-19 testing on America's front line

XpresCheck is committed to helping protect America's airports—and the health of everyone who passes through them—with fast, accurate COVID-19 testing right at the airport. We offer several different COVID-19 tests for patients age 5 and older, including one at certain locations that provides results while you wait.

Rapid Molecular COVID Test

With this test, a sterile swab is inserted into your nose to take a sample. The sample is checked right in our lab for active COVID-19 virus. Results are available while you wait.

Polymerase Chain Reaction (PCR) Test

Like the rapid molecular COVID test, a sterile swab is inserted into your nose to take a sample. The sample is then sent to a lab to check if the active virus is in your body.

Blood Antibody Test

Using a blood draw or a small prick of your finger, this test looks for markers in the blood that suggest you may have had the COVID-19 virus. Called "antibodies," these markers can tell if you are infected or have been infected in the past, even if you never had symptoms.

For more information about COVID-19 testing, see **Frequently Asked Questions**.

Most XpresCheck facilities are open Monday through Friday, 10:00 AM – 6:00 PM.
Choose your airport to see the hours for a specific location.

Here's how it works

1 Schedule your appointment online.
You'll be taken to a separate scheduling website to create an account (or to sign in, if you're already registered with us) and make an appointment. This should only take about 5 minutes, and you will get an email from XpresCheck confirming your appointment. *Please set only one appointment per patient.* **Schedule your appointment here.**

2 Fill out the registration forms before your appointment.
We will email some forms for you to print, fill out, and bring with you to your appointment. *This important step minimizes your time on-site, helping to keep everyone safe.* Please allow up to 24 hours after scheduling your appointment for this email to arrive.

3 Arrive no more than 5 minutes before your appointment time.
Bring your completed forms, a valid ID, your insurance card, and payment if you are paying out-of-pocket. Wear a face covering over your nose and mouth, and please be sure to follow social distancing rules when you get here.

4 View your test results on our private portal.
If you took the Rapid Molecular COVID Test, we'll text you when your results are ready—typically within 30–45 minutes. For all other tests, go to our private patient portal 3–5 days after your test date and follow these steps to see your results: Log in to the portal, select "Records" from the main menu, then select "Lab Results."

Questions? Call 1-844-XPRESCK (1-844-977-3725).
