Business VPN Satellite: reliable connectivity solutions for all your sites

Business VPN Satellite offers highly reliable satellite services in regions with poor or non-existent communication infrastructure but also extends Business VPN over the sea, enhances crew welfare and ship navigation and optimizes fuel usage. Orange provides managed satellite services anywhere on the globe, with secure access to your corporate IP based VPN, enabling critical applications, voice, videoconferencing, and even Telepresence.

Orange Satellite Service is complementary to the Orange Business VPN Network and, as such, can be considered as an access method within our product portfolio for difficult-to-reach areas. Orange Satellite Services contain two service types designed to fit the market expectations of large enterprises: terrestrial and maritime.

 <p>Business VPN Terrestrial</p> <ul style="list-style-type: none"> • Terrestrial offers highly reliable satellite services in regions with poor or non-existent communication infrastructure or as back-up to improve the resilience of customers' enterprise networks. • Uses fixed antennas on or near customer buildings. 	 <p>Business VPN Maritime</p> <ul style="list-style-type: none"> • Maritime offers the same quality as terrestrial but with unique stabilized antennas which move while on board ships and floating platforms. • Maritime extends Business VPN over the sea, enhances crew welfare and ship navigation and optimizes fuel usage.

Orange Satellite network solutions

Orange provides a wide range of Satellite network solutions that can help global organizations seamlessly leverage and integrate into their Corporate Terrestrial Network. Orange brings digitalization on remote sites.

Performance

Orange has strategically positioned 12 Region Teleports Globally to provide optimal performance for remote Locations access to both Corporate and Internet Networks.

Complementary services

Orange Satellite Solution is another access technology into Business VPN offering and allows the ability to add on other Orange Value-added Services that Orange has to offer from its Portfolio, such as Business Talk

Real time visibility

100% visibility into every piece of the network from the terrestrial backbone all the way to the remote site with industry leading secure customer portals.

Continuously reinforced position in the maritime industry

Development of a Maritime Satellite service completely integrated with Business VPN.

Global, that helps reduce Voice cost by converging Voice and Data traffic onto the same link and with market leading voice rates.

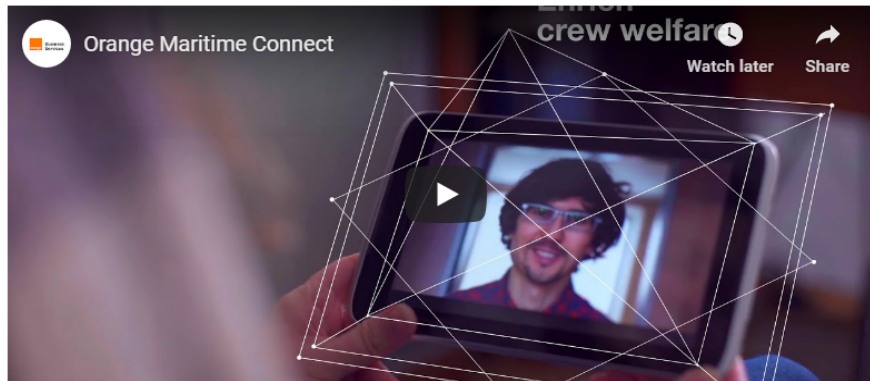

Satellite services enable to work continuously, everywhere

We specialize in delivering satellite services and expert consultancy across multiple business sectors, and are able to combine many different technologies and networks to help you drive your digital transformation. Orange provides satellite services to customers in all kinds of industries and powering all kinds of use cases.

 <p>Transport & Logistics</p> <ul style="list-style-type: none"> Maritime shipping, on board moving vessels Aero, above countries and over ocean, requires permanent connection with land 	 <p>Finance & Insurance</p> <p>Banking locations in developing countries, with no reliable local telecom</p>	 <p>Government & Institutions</p> <ul style="list-style-type: none"> Government agencies needing encrypted, secure communications anywhere on land Humanitarian aid organizations in hard to reach locations 	 <p>Retail</p> <p>Proximity store in peri-urban areas</p>	 <p>Oil & Gas Utilities</p> <p>Mining sites, oil and gas drilling, offshore locations and gas station</p>

Digitalization at sea

Maritime companies need their ships to be effectively "offices at sea", connected to the corporate network on land and that requires the right connectivity. Maritime Connect seamlessly integrates your vessels into your corporate network and provides application access, cost control, crew welfare and secure connections overall supporting real-time decision making.

Secure network services from Orange support vital humanitarian work

In a war zone communication is everything. Good communication helps save lives.

Charlotte Lindsey-Curtet, Director Communication and Information Management ICRC
