Description :

Use cases:

Hi is a smart video intercom designed by French manufacturer Fenotek. Hi helps you keep control of your front door from anywhere and anytime with just a tablet or a smartphone. Hi integrates remote opening, alarm, video monitoring, motion detection and virtual keys management. It offers mobility, flexibility, and security benefits to its users.

Benefits:

CALL BUTTON: When a visitor presses the ring button, Hi calls you on your smartphone (up to 8 users). Take the video call, see and chat with your visitor. If Hi is connected to an electric lock or a Bluetooth lock, you can remotely open the door from your phone. No more missed visitors: friends, hosts, deliveries...

MOBILITY: Because it connects via WiFi or 4GLTE, Hi can be installed anywhere. Its robust zamak casing allows it to work in any environment.

ACCESS MANAGEMENT: Create unique virtual keys (QR Codes) and send them to your guests (friends, clients, Airbnb hosts, coworkers...). Once they'll scan their code at your door, they'll have access to your facilities during the time you've defined.

SECURITY: Thanks to its motion sensor, Hi sends a notification to your smartphone each time it detects a suspicious presence near your place. The video surveillance mode allows you to activate Hi's camera on your phone to see what is going on. If you detect an unwelcome presence, you can trigger the embedded alarm.

Package:

- 1 x Hi Smart video intercom.
- 1 x Installation kit (Torx safety screw driver, screws, installation template, Mini USB/USB cable).
- Free Gold 4G subscription activated for 3 months (from the day of order).

Offer benefits
