Description :

Uses :

Massive distribution of an alert message (health crisis, technical crisis) from a decision-making center to field teams, request for automatic restocking of new products/components/spare parts, request for call back from a supplier (obtaining information, service), request for on-site intervention (shortage of consumables, technical problem), queue management in stores (general public) or in administrative centers, sales call in stores, time and attendance of intervention staff...

Benefits :

- Optimization of crisis management
- Improved responsiveness
- Loyalty and satisfaction of your customers/users
- Optimization of the management of your activity

Contents of the pack:

- Access to the solution for 6 months
- Devices: 10 Live Button GSM advanced (4 LEDs, buzzer, vibrator), 10 power cable to recharge the button
- GSM service: 240 presses per button per month including the lifeline (message sent regularly by each button to check its effective connection to the GSM network). 0.02€/additional button press.
- Downward notifications to unlimited buttons (allows you to vibrate/ring buttons remotely)
- Access to the button park management portal
- Assistance in getting started with the portal, support for the deployment of the technology (framing meetings, follow-up, assessment)
- Secure data processing and hosting
- Shipping costs in France included
- After-sales support (tel and web; Monday to Friday from 8am to 5pm); button and cable guaranteed 2 years, excluding button battery (1 year)

The advantages of the offer:

- An all-in-one package: includes buttons, GSM connectivity, button fleet management portal, data processing platform
- A quality Live Button: autonomous (700 mAh battery and rechargeable via mini USB port)
- An easy-to-use offer for all types of applications: no need for a relay gateway, connectivity is embedded in the button.
- A ready to use offer: the provisioning of buttons on the IoT platform (Internet of Things) is already carried out by Orange teams.
- An easy to install button: fixing on a metallized surface thanks to its 2 magnets
- An autonomous management of the button park: configuration of the buttons, structuring of the button park according to needs.

Details of the pack:

- Button: Ø 65 x H20 mm, 45 g, battery 700mAh, rechargeable via micro USB, USB power cable included, Bluetooth Low Energy (BLE), buzzer, vibrator, 0° to + 45°

operating temperature, 2 magnets for fixing on metal structure.

- Fleet management portal: configuration of buttons and alert thresholds, association of actions related to button presses (sending email, triggering actions to the customer IS), history of actions related to buttons, monitoring of button battery level, monitoring of button anomalies, sending notification to buttons, etc.
